

SASA MRDOVIC, UNIVERSITY OF SARAJEVO, BOSNIA AND HERZEGOVINA

All the information in this case study was generously provided by Sasa Mrdovic, computer security professor at University of Sarajevo. Sasa is also an expert witness and digital forensic investigator. Practical use of Belkasoft Evidence Center is included in his curriculum. Sasa also uses BEC to perform digital investigations for his court appearances.

The **business challenges** that led Sasa to evaluate and use Belkasoft Evidence Center:

- Showing how an excellent digital forensic tool works as a part of a computer security course
- Performing digital forensic investigations for court

“ I think that this is a great forensic tool that I would highly recommend to anyone involved with digital forensics. ”

Sasa Mrdovic finds the following BEC viewers the most useful in solving cases:

- Hex Viewer
- Case Explorer
- Overview

The **benefits** Sasa has experienced using Belkasoft products:

- Amount of artifacts and data types supported out of the box
- Mobile devices and hard drives acquisition
- Advanced low-level analysis
- Fast data extraction

General impression

“Students were able to very quickly learn how to efficiently use Belkasoft Evidence Center. They were able to create a case, perform data collection and analysis and create report during limited time provided for lab. My impression is that students were amazed with what can be retrieved and reconstructed from a device using Belkasoft Evidence Center. ”
