PRESS RELEASE

New Belkasoft Forensic Tools Available Exclusively through EnCase® App Central

Belkasoft®, a developer of forensic analysis tools, announced today that it has published its entire Evidence Center product line on Guidance Software, Inc.’s EnCase® App Central, an online community and marketplace for digital investigators. Belkasoft’s products are designed to meet the increasing demands of digital investigators who need specialized artifacts while maintaining efficient workflows within the EnCase® digital investigation platform. Two of the four editions, Chat Analyzer and Chat & Social Analyzer, are available exclusively through EnCase App Central.

Belkasoft® Evidence Center’s powerful analysis exposes hundreds of artifacts, while seamless automation between Evidence Center and EnCase® Forensic reduces investigator time and effort. Available now on EnCase App Central, Evidence Center features extensive search and data carving capabilities which, coupled with EnCase Forensic, give investigators visibility into a diverse set of artifacts resident on disks and in live RAM. Evidence Center exposes instant messenger logs, internet browser histories, mailboxes of popular email clients, social media remnants, peer-to-peer data, multi-player game chats, Microsoft® Office documents, pictures, videos, encrypted files and mobile backups.

Guidance Software is a leading provider of digital investigations software and hardware. The company’s EnCase Forensic is used extensively by government, corporate and law-enforcement authorities worldwide for digital forensic investigations. EnCase App Central provides access to fully tested and verified apps—both free and paid, information on forensics best practices, and community support. The apps are built using the EnCase® EnScript programming language, and each app is vetted and tested by the technical team at Guidance Software before it is made available at EnCase App Central.

"Belkasoft is excited to be one of the first EnCase App Central solutions," said Yuri Gubanov, Belkasoft founder and CEO. "We decided to tailor our tools specifically for EnCase Forensic users. The two new editions of Belkasoft Evidence Center offered via EnCase App Central are unique for our product range, and designed specifically to meet the needs of EnCase customers."

"For 15 years, EnCase has been enabling forensic investigators to conduct thorough and rapid digital investigations by offering an open but powerful platform that can be customized to automate specific, repeatable tasks," said Alex Andrianopoulos, vice president of Marketing for Guidance Software. "Belkasoft Evidence Center on EnCase App Central is a testament to how the EnCase open architecture and EnCase App Central both make very powerful and innovative
solutions from partner developers possible and readily available to EnCase end customers. EnCase App Central empowers ecosystem developers like Belkasoft with a monetization avenue through access to the thousands of EnCase customers."

Belkasoft Evidence Center is available on EnCase App Central in four versions:

– Chat Analyzer ($199)
– Chat and Social Analyzer ($499)
– Professional ($799)
– Ultimate ($1,099)

Information on Belkasoft Evidence Center, as well as the free demo download, is available at http://belkasoft.com/
